

SVE Truck Chain

Svetruck began in nineteen seventy seven, designing a durable, reliable and service-friendly lift truck. When they started that year the company had a clear vision of the kind of business they wanted to be and the types of items they wanted to manufacture. Svetruck specializes in producing lift trucks that enable the individual operating it to operate effectively within challenging environments. Svetruck believes that being capable of performing safe and successful material handling in the best way possible helps in order to add to a constructive working atmosphere.

Their facility in Ljungby is home to the production of log-stackers, forklifts as well as container handlers. Nowadays, Svetruck is proudly supplying lift trucks worldwide.

Focused on the future, Svetruck remains totally devoted to safeguarding their excellent status of makers of durable and reliable forklifts. Their fundamental approach to solid experience, high quality and more than 30 years of knowledge in the area, means they can offer people excellent solutions for their material handling requirements.
